Alan Long

alanlong.design

Five years at agencies in London across design and development. Notable clients include Google, Mercedes-Benz, Samsung and WSJ. I take a systems-led approach to design that runs from high-level architectural choices through to visual craft.

Experience

Interbrand – Agency

UX/UI Designer | 2021 – 2025

Senior IC role leading product design across complex B2B and design system projects.

- Led design projects across pharma, automotive, engineering and consumer-facing brands, including GSK's first company-wide design system and Mercedes-Benz's paid-media analytics platform.
- Delivered UX audits, multi-platform design systems, B2B product redesigns and brand-led digital experiences for clients including Samsung, BMW and AtkinsRéalis.
- Worked across the full design lifecycle from research and IA through to production handoff, often as the sole product designer on a project.
- GSK commissioned multiple new projects based on work I led.

Internal leadership at Interbrand

- Selected for the Horizon Board (2023–24), one of ten employees consulting with the global leadership team. Focused on the impact of AI on the agency's business model.
- Featured in the Best Global Brands 2023 report, contributing to a roundtable on AI's impact on brands as the only designer in a panel of senior leadership and strategy.
- Co-led the adoption of Figma across the London team, enabling collaboration between brand and product teams.

Cheerful Twentyfirst – Agency

Design Engineer | 2020 – 2021

Sole product designer and front-end engineer at the agency. Owned the design and build of digital platforms across the client roster.

- Established the agency's pattern library and component approach for event platforms, used across subsequent projects.
- Worked directly with clients from pitch through to delivery, with no design or engineering layer between me and stakeholders.
- Google and WSJ commissioned multiple new projects based on their experience working with me.

Freelance designer and developer

Designer & Developer | 2017 – 2020

Freelance design and development for a range of clients across web, mobile and identity.

Education

University of the West of England

Digital Media BSc (Honours) – First class

Second year spent at ITU Copenhagen

2016 – 2019

Volunteering/Extra responsibilities

Mentoring

Ongoing mentoring of graduate designers building a career in product design.

Cambridge University

Created the brand and online presence for Cambridge University's open-source ventilator system initiative.

Bath University

Provided UX expertise to Gitbuilding, an open-source hardware Git tool.

Skills

Design

Product design, design systems and tokens, accessibility, prototyping, brand-aligned design.

Engineering

HTML, CSS, Git. AI-assisted development workflows. Comfortable in engineering teams discussing implementation.

Tools

Figma, Framer, Adobe Creative Suite.
